PISCXS

Waterproof Connector

Intelliconnect has developed a range of IP68 waterproof connectors which employ a unique internal sealing system rendering our products waterproof in both mated and unmated conditions.

Available from stock or custom designed to your exact requirements, Pisces products are available in Multipin, N, TNC, Push-Pull, SMA and all other styles of RF/Coaxial connector or adapter.

All products are certified waterproof at a minimum of 10m for 4 hours and are currently being used worldwide in military systems such as: radar, soldier comm equipment, vehicle antenna / comm systems, UAV's, ROV's, submarine.

Other applications include medical (cochlear implants), commercial outdoor antenna systems, oil and gas pipeline monitoring, marine, rail, radiation detection, seismic movement sensors and just about any harsh or wet environment!

Typical Miniature Waterproof Interconnect Configuration

Features:

- Sealed Unit is Waterproof minimum 4 hours at 10m depth.
